

THE VAN HORNE INSTITUTE

Renewable Electricity Conference

Conference on the Economics of Electricity Generation and the Environment

Meredith Fowlie

Associate Professor and Research Associate

UC Berkeley's Energy Institute at Haas and the National Bureau of Economic Research.

Meredith Fowlie is an associate professor in the Department of Agricultural and Resource Economics and a research associate at UC Berkeley's Energy Institute at Haas and the National Bureau of Economic Research.

Her research focuses on the economics of energy and the environment. She has worked extensively on market-based environmental regulation of energy and energy-intensive industries. She is also interested in the demand-side of energy markets, energy efficiency, the economics of renewable energy, and energy consumption in the developing world.

Fowlie received her undergraduate degree from Cornell and her Ph.D. from UC Berkeley.
