Vineeta Maguire
VP, Supply Management Services
Encana

Vineeta Maguire is the VP of Supply Management Services (SMS) for North America. The team has a key role in managing Encana's contracts and cost by streamlining our day-to-day demands across Drilling, Completions, Facilities, Operations, and Compliance across all assets.

Vineeta's focus for SMS is to build stronger partnerships with the business. The goal is to identify Supply Management initiatives that can be measured through improved program economics, optimized capital and mitigated risk for the company. Success is defined on 'One scorecard'.

Prior to this role, Vineeta was the VP Operations Services – overseeing the Canadian Drilling, Completions, Construction, Facilities, EH&S, Stakeholders and Regulatory at Encana. Her technical leadership has also included leading the New Ventures development team for the Canadian Division and the technical team for the Horn River asset for two and a half years.

Vineeta has a Masters in Chemical Engineering from the University of Calgary with 25 years of experience in the oil and gas industry. She has a background in reservoir, production and operations engineering. Vineeta has lead integrated technical teams for the last half of her career for BP and Encana.
