

**THE VAN HORNE INSTITUTE**

## **Renewable Electricity Conference**

Conference on the Economics of Electricity Generation and the Environment

**Tim Weis**  
**Policy Director**  
**Canadian Wind Energy Association (CanWEA)**

---

Tim Weis is a professional engineer and the Policy Director for the Canadian Wind Energy Association (CanWEA) where he works on public policy, research and advocacy activities for Canada's wind energy industry. Tim has published research on renewable energy development in Canada for 15 years, ranging from technical research, to community engagement to policy design.

Tim has a Master's and a Bachelor's in mechanical engineering and a Ph.D. in environmental sciences, where he studied wind energy development in off-grid Canadian communities. Tim is also an adjunct professor at the University of Waterloo's Department of Geography as well as the University of Alberta's Department of Mechanical Engineering.
